**SUBJECT: SEI Liaison Report**

**DATE: 1 August 2014**

This document serves as a summary of the UC Berkeley Script Encoding Initiative's recent activities.

Work on scripts in 2014 has slowed considerably, due to a gap in funding. However, potential projects on Proto-Cuneiform, Proto-Elamite, Puaj Txwm (Hmong script), Runic extensions, Latin extensions, and Mayan hieroglyphs are being discussed with experts, and Deborah Anderson is currently applying to NEH and other grant agencies to fund further work from 2014-2016.

In October 2014, a meeting in Kathmandu will take place to discuss work on two scripts used in Nepal, with support from the Wikimedia Foundation. (A report on the meeting and its outcome will be provided in the next liaison report.)

The following scripts are in the preliminary stage or are still undergoing research and are not yet ready for approval:
